Linkedin: <https://www.linkedin.com/in/danielecheverri-fullstackdeveloper/>

Portfolio: <https://daniel-echeverri-portfolio.netlify.app/>

Full Stack Developer with 2 years of experience specializing in backend development with .NET. Proven track record of delivering scalable solutions, optimizing performance, and modernizing legacy systems. Strong communicator in Agile environments, with a passion for clean architecture, business-aligned development through Domain-Driven Design (DDD), and continuous learning. Actively expanding into AI development through personal projects to stay ahead in emerging technologies. Core tech stack: C#, .NET, SQLServer, Angular, Azure.

Software Skills

- Languages & Frameworks: C#, .NET Core, .NET Framework, ASP.NET, ADO.NET, Entity Framework, MVC, JavaScript, TypeScript, Angular, HTML, CSS, Tailwind, Python, xUnit, Moq, React, Blazor, Go.
- Databases & Reporting: Sqlite, SQL Server, Power BI, MongoDB, Datadog, Logz.io.
- Cloud & DevOps: Azure, Docker, Git, GitHub actions, PowerShell, Bash, Shell
- Architectures: Onion, Microservices, Layered.
- AI & Automation: Prompt Engineering, OpenAI API, Copilot, Claude Code, MCP and Skills.
- Other Tools: Postman, Soap UI, BrowserStack, Jira, SonarQube Cloud, Confluence, IIS, Umbraco CMS, Amadeus, Redux, Linux.

Additional Skills

Agile Methodologies, Domain-Driven Design (DDD), Object-Oriented Programming (OOP), SOLID Principles, Portal Azure/Azure DevOps, CI/CD, Business-Oriented Development, Communication Skills, Collaboration, Autonomy, Critical Thinking, Problem Solving

Professional Experience

Trainee full stack developer at Pulsatrix (<https://pulsatrix.co/>).

January 2024 – June 2024 (Remote)

- Contributed to the development of a full-stack application for the private security sector with cutting-edge technologies such as Angular 17, GitHub, Tailwind, Material UI, Ionic, JWT, and Nest.js.
- Met clearly defined objectives, ensuring efficient progress and alignment with project goals.

- Actively participated in weekly meetings with the project's lead engineer and project manager.

Full stack developer SSR Kivio SAS (<https://www.kivio.com.co/es>).

July 2024 – Current (Remote)

- Contribute to the development and maintenance of the full-stack Internet Booking Engine (IBE) for [Cyprus Airways](#) and [Sun Express](#) utilizing Angular, .NET, and Azure DevOps to deploy
- Achieve clearly defined objectives, ensuring efficient progress and alignment with project goals.
- Analyze and implement new features in the IBE, as well as maintain existing ones.
- Collaborate remotely with the Kivio tech team from my home office.
- Ensure all work is guided by clearly defined objectives.
- Actively participate in daily meetings with the lead engineer and project manager.
- Analyze logs to understand cause of incidents and to improve commonly used and high-demand flows within the application.
- Write unit tests to increase coverage for both existing and new features.
- Integrate third-party APIs and external services (such as Amadeus's Passenger Service System and PROS services for pricing) into the airline software for: [Cyprus Airways](#).
- Write technical documentation prior to new implementations, including feasibility analysis, proposed approaches, technical diagrams, and clear instructions for team members to follow as a guide.
- Administer the Umbraco CMS of the Cyprus Airways IBE, including dictionary updates, configuration changes, and other related tasks such as RN creation/update among others.
- Provide tested code that complies with SonarQube rules through descriptive and well-structured pull requests.
- Use Claude Code and Copilot to perform spikes, development plans and execute parallel workflow related to bug fixes or new features.

Education

Institution: Codecademy

Title: Front-end Engineer.

Dates: 08-2021 – 04- 2023

Description: An online comprehensive and in-depth career path. The career path covers the essential elements of web development: semantic HTML, CSS, and JavaScript in depth (Variables, Arrays, Loops, Objects, Classes, Functions, Recursive programming, and Algorithms). It also teaches how to tackle the front-end stack using React and delves deeper into the use of Redux for state management in large applications.

Institution: Codecademy

Title: Web development.

Dates: 08-2021 – 04- 2023

Description: Backend foundation online course with focus on: Node, SQL, Express.js, Mongoose.

Institution: Código facilito

Title: Bootcamp de aplicaciones web con .NET.

Dates: 12-2023 – 04-2024

Description: In depth full stack online bootcamp to develop complete application using ASP.NET Blazor, Linq, EF, JWT, Relational DBs and Azure.

Institution: EPAM Learn Platform

Title: *.NET Fundamentals – Data Processing and Software Architecture NET6 Edition*

Dates: 04-2024 – 05-2024

Description: *Backend foundation online course with focus on: C#, EF, SQL, Design Patterns, Architecture, SOLID.*

Institution: Universidad Tecnológica de Pereira

Title: *Bachelor degree in Philosophy.*

Dates: 01-2012 – 08-2016

Description: Graduated with honors – High GPA. Full scholarship award to a complete master degree in the same institution. Developed strong analytical thinking, problem-solving, and communication, which provides a unique foundation for strategic problem-solving.

Institution: Universidad Tecnológica de Pereira

Title: *Master degree in Philosophy.*

Dates: 02-2017 – 04-2019

Description: Graduated with honors – High GPA.

Other courses and certifications in my [LinkedIn](#) profile.
